The ScottCare Corporation to acquire Rozinn Electronics, a leading manufacturer of cardiac diagnostic products

Cleveland, OH – Cleveland-based **The ScottCare Corporation**, a leader in non-invasive external counterpulsation (ECP) therapy and cardiopulmonary rehabilitation telemetry, announced today that the company has signed a definitive agreement to acquire the operations of **Rozinn Electronics, Inc.**, a privately-held market leader in cardiovascular diagnostic equipment based in Glendale, NY.

“ScottCare is pleased to add Rozinn to its portfolio of leading cardiopulmonary rehabilitation telemetry and ECP therapy products,” said Ken Zajackowski, General Manager of The ScottCare Corporation. “Combining Rozinn’s market leading product portfolio, diagnostic capabilities, and global reach with ScottCare’s outstanding product technology, customer support, organization, and financial strength will provide ScottCare with the platform to develop a broader array of innovative products for cardiac care, both office based and in hospitals.”

“I’m proud of what we have been able to achieve at Rozinn,” stated Mark Rosoff, co-founder of Rozinn Electronics, Inc. “My co-founder Karl Ziemann and I are looking forward to joining the ScottCare team. ScottCare will not only strengthen our business; it will provide the resources needed to develop the next generation of products to improve the way cardiologists practice medicine.”

ScottCare will accelerate worldwide development, marketing and support for Rozinn’s diagnostic product suite including Holter for Windows+®, Pacemaker and Event Monitoring Products. In addition, ScottCare will expand the availability of its leading cardiac rehab telemetry and ECP therapy products outside North America through Rozinn’s extensive international network of dealers.
